

Actual aspect ratio for project is 900;600/3:2

Sides will have more Blank space

Title Screen : 400;260 is closest I can reach accurate ratio.

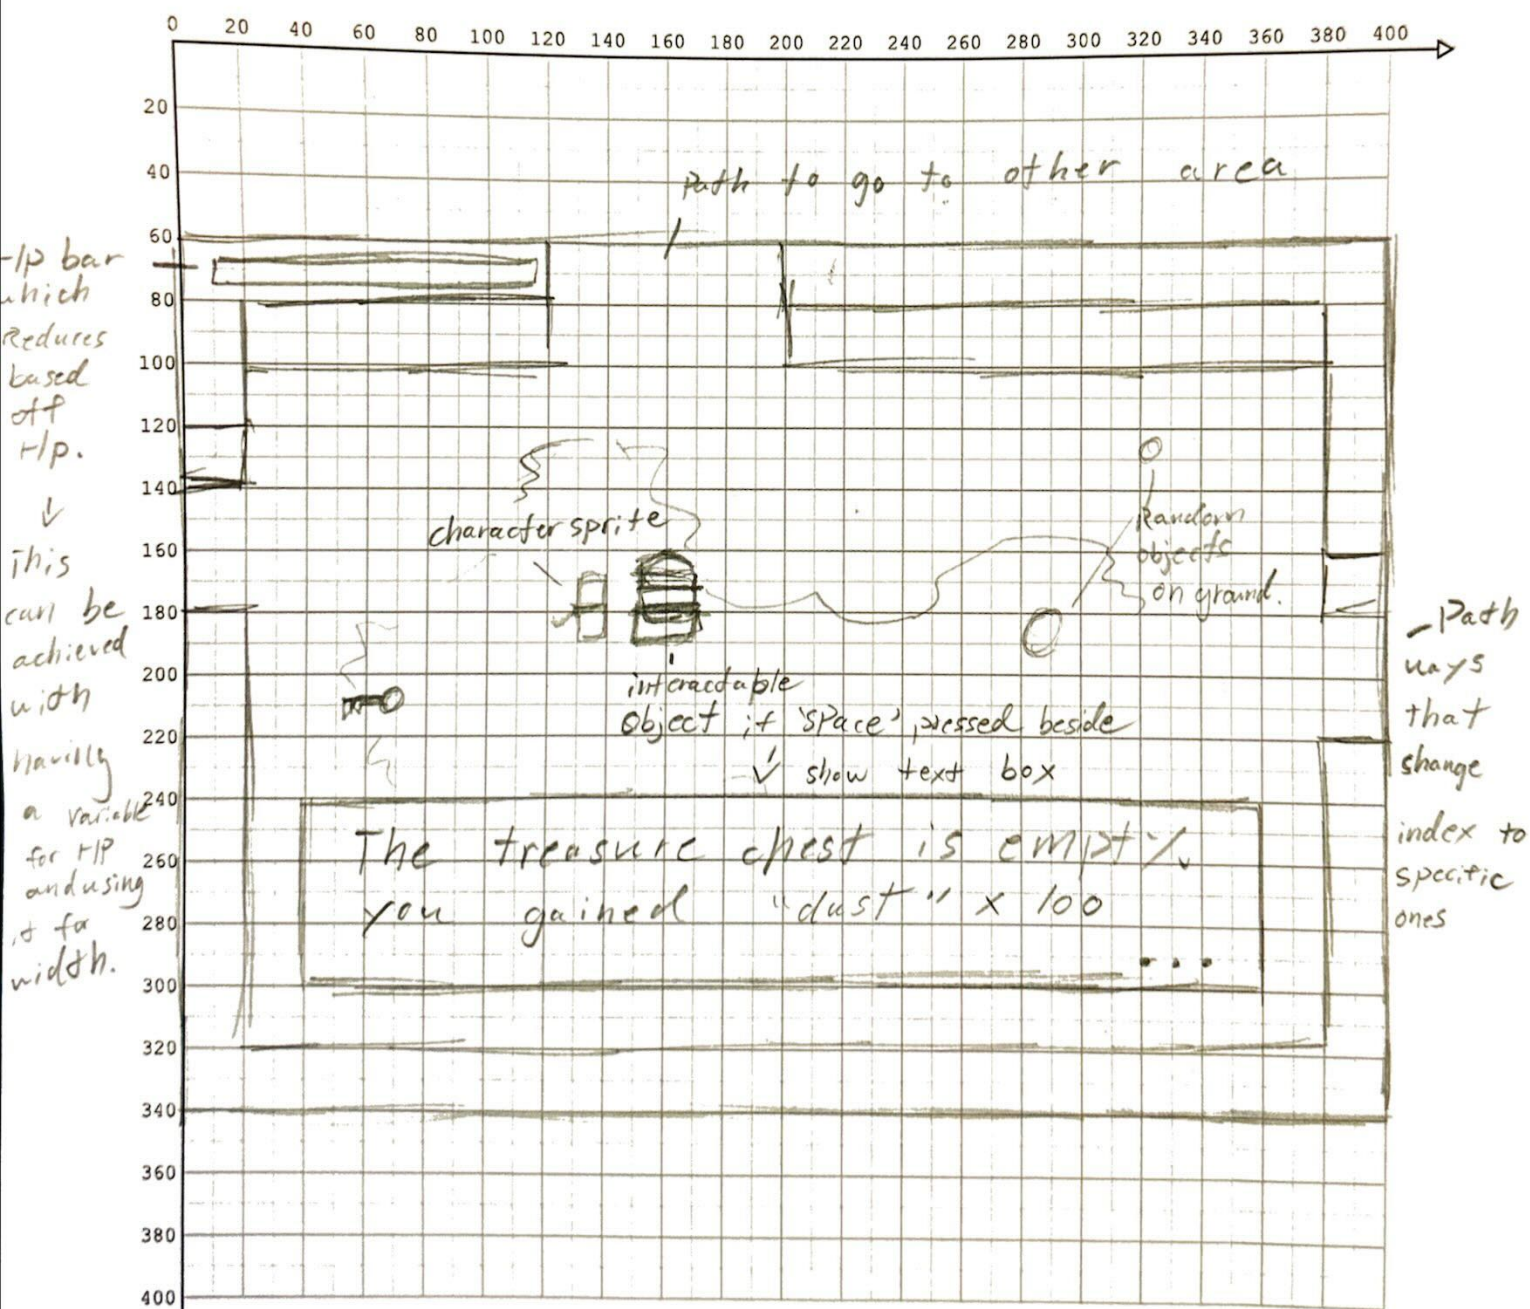

Most of the screen will

be using a `PImage` to make  
life easier.

The only code that needs to be done is making  
workable buttons using if statements and variables.

Pixel Paper - 400 x 400  
Graph Paper for Screen Coordinates

Main overworld : Includes small snip of dialogue and interaction

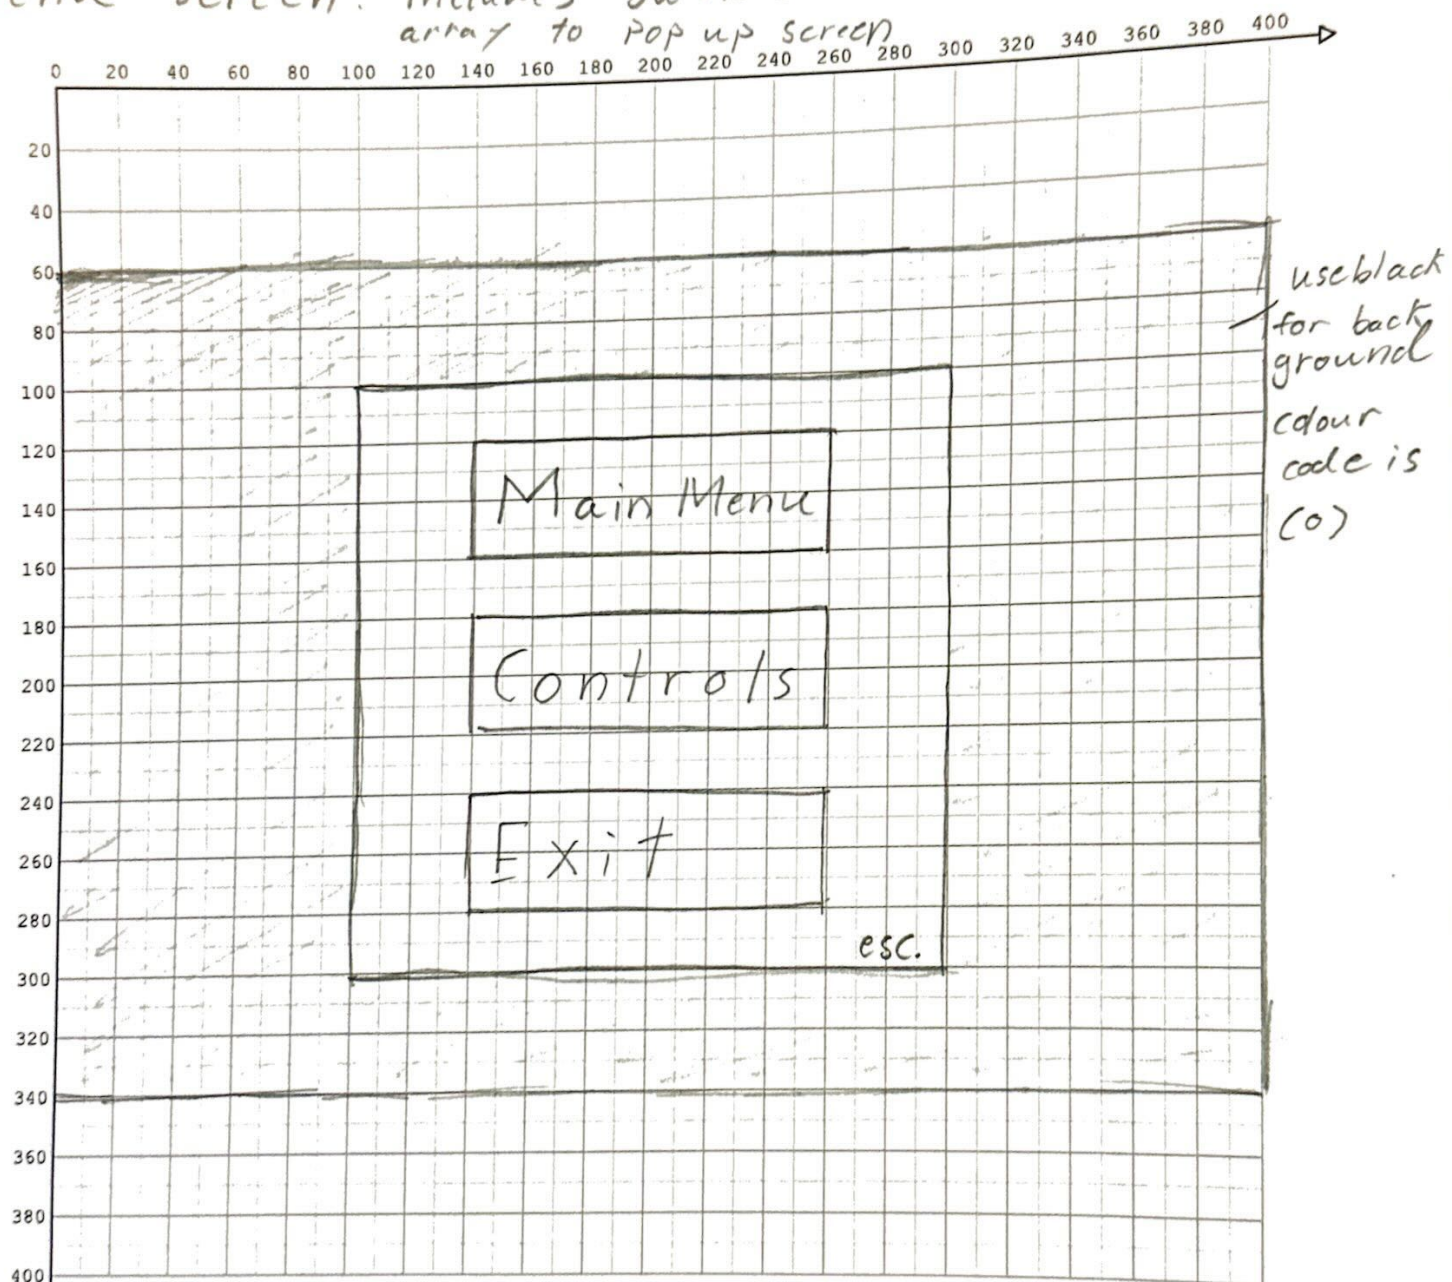

Have each Room tied to a certain index, have each time the character crosses certain points on the map like the corridors,

There will be trap chests as well which deals dmg to character which will lower health bar.

Pixel Paper - 400 x 400  
 Graph Paper for Screen Coordinates

Menu Screen: includes buttons which changes index of array to pop up screen

escape key during game play to pop up menu

escape key to close

have statement going @ if (popup open = true & keycode 'Escape')  
move array
